PROJECT  
 MANAGEMENT

**Project**

Rapleys were appointed by Coventry City Council to lead the design, procurement and delivery of a three classroom extension at Sherbourne Fields special school. In response to increasing pupil numbers, the school required additional teaching rooms including a new home economics suite, a science lab and meeting space.

Sherbourne Fields caters for pupils between the ages of 2 and 19 with a broad spectrum of special needs including physical disabilities, medical conditions and learning needs.

**What we did**

As project lead, Rapleys were responsible for the appointment and coordination of a team of trusted sub consultants including structural engineer, mechanical and electrical consultant and ground investigation team. We worked with the school to offer design solutions to meet the wide ranging needs of the pupil and offer a flexible and high quality facility.

**What we achieved**

Through our role as Principal Designer, we worked with the project contractor to safely manage the build in a live school environment. Our end user engagement through the project ensured our proposals were always influenced by Sherbourne Fields’ inclusive and creative philosophy and tailored to the needs of the pupils.
