- 1 These areas have been calculated in accordance with the method defined by (RICS, Client etc) net, gross etc.
- 2 For the avoidance of doubt, the area of the toilet in the dwelling unit (i.e. in the Bedroom Unit) is included in the N.I.A. (Net Internal Area).
- 3 These areas have been measured off preliminary drawings using the stated conventions:
- 4 § There is design development yet to take place that might affect them.
- 5 § The building may present anomalies in relation to surveyed/drawn plans (include for existing).
- 6 § The Contractor is required to work to specific tolerances during construction.
- 7 Take account of these factors before planning any financial or property development purpose or strategy.
- 8 Seek confirmation of areas before decision-making.
- 9 The areas are approximate. They relate to the likely areas of the building at the current state of design, using the stated option (eq NIA) from the Code of Measuring Practice 5th Edition RICS/ISVA.
- 10 Decimal places to be ignored and numbers rounded down.
